ABSTRACT

Nowadays, too many illegal rentals of cars. The cars price is not fixed as the supplier puts the price at will. The agreement of the car rental also takes a long time to produce for the purpose of agreement between supplier and customer. Customer information is also not kept safe. This system objective is to design car rental system for the supplier of car rental and the customer by using authentication checker. Therefore, it also to develop the car rental system for the supplier of car rental and the customer. This project also test the network performance of the car rental system. This system has a customer and staff side. In order to solve the problem, the car rental system using authentication checker are designed and built. This project is made to ease the participant satisfy with this car rental system process and it also can reduce completion time and risk. Finally, this project also can produce assurance of data.
